13.38 Average Strings (Loops - Hard)

OBJECTIVE: Remove strings from *test_list* whose average value is 6, and print the resulting list.

NOTE: *test_list* is created & imported from the module *test_data.py* into *main.py*

Sample Inputs/Outputs:

```
Example 1: test_list = ["66", "75", "286"] prints ['286']

Example 2: test_list = ["22", "1887", "91"] prints ['22', '91']
```

LAB ACTIVITY	13.38.1: Average Strings (Loops - Hard)	0 / 11

Current file: **main.py** ▾   Load default template...

```python
1  from test_data import test_list
2
3  #Write your code here
4  #NOTE: Be sure to comment out any debug/print statements before using Submit Mode
5  |
```

Develop mode	**Submit mode**	Run your program as often as you'd like, before

submitting for grading. Below, type any needed input values in the first box, then click **Run program** and observe the program's output in the second box.

Enter program input (optional)

If your code requires input values, provide them here.

Run program   Input (from above) ⟶   **main.py** (Your program) ⟶

Program output displayed here

Coding trail of your work   What is this?

History of your effort will appear here once you begin working on this zyLab.
